

Shaping a Greener Future of Process Engineering

For over 35 years, Procesni Inženiring has specialized in designing and upgrading advanced thermal systems for energy-intensive industries. From pollution control devices to waste material recycling systems to industrial dryers and furnaces, our systems are engineered to reduce natural gas consumption, cut CO_x/NO_x emissions, and increase process efficiency.

As a family-owned company, we combine deep engineering expertise with long-term vision—offering solutions that are reliable, easy to integrate, and environmentally responsible. With installations in over 13 countries, we help industries build toward a cleaner, more sustainable future.

Our Technologies

Exhaust Air Purification Systems

RTO

TO

Waste Material Recycling

Battery recycling

Aluminium recycling

HES – Highly Efficient Systems (Advanced Energy Utilization)

Dryer with integrated TO

Procesni Is Coming to Pollutec 2025

Procesni Inženiring is excited to announce our participation in **Pollutec 2025**, one of the leading international trade fairs for environmental and energy solutions.

At this year's event, we'll present the full scope of our product portfolio—including a first look at **OptiSyn TCR™**, our latest innovation in energy recovery. It's a powerful step forward in reducing natural gas consumption and emissions in high-temperature industries.

Additionally, we'll also be hosting a **roundtable discussion** at the fair with experts from various industrial sectors to discuss important topics surrounding industrial sustainability, make sure you don't miss out.

Lyon, France | 7–10 October 2025

Our Stand: H5-A062

**Roundtable Discussion at Pollutec: Wednesday 8th October at 13:10 – 13:55
at the Sustainable Industry Forum**

Visit us to explore how we help industries reduce environmental impact without compromising performance. We'll be showcasing real-world applications and our full range of energy-efficient technologies that support sustainability through smarter process engineering.

Let's Build a Cleaner Future—Together

At Procesni, we believe high performance and environmental responsibility go hand in hand. Let's meet in Lyon and explore how we can shape the future of process engineering—efficient, resilient, and sustainable.

We look forward to welcoming you at Pollutec 2025—or connecting with you at another opportunity!

Join Us at Pollutec 2025

Apply for a free visitor pass and schedule a one-on-one conversation with our team. We'd love to hear about your specific challenges and explore how our technologies can support your environmental and operational goals.
